

Suitable for areas prone to flooding

Part No. 14106 without technology

Part No. 14107 with ULE technology

Part No. 14108 with NB-IoT technology

Part No. 14229 with LoRaWAN technology, new from 07.22

Specifications

Material: PP, ABS
Weight: ca. 3400g
Dimensions: Height ca. 46cm, diameter ca. 24cm

Use

The ToxProtect 1602 is a bait protection box that protects the bait from contact with the water and provides data on the rat control carried out (when one of the available technologies is used).

The ToxProtect 1602 is used in areas that are prone to flooding. The rats can eat the bait attached inside undisturbed. When the box is used combined with one of the available technologies the number of visits by the rats along with other documentation are recorded by the ToxProtect and made available in the WebService.

Advantages

- **Used in areas prone to flooding**
- **Simple bait change process**
- **Mounted using support brackets**
- **Separate mounting rails installed at different locations allow for easy relocation**
- **Protected against backwater flow thanks to the patented and secure locking system**
